ABOUT RADPRO TELERADIOLOGY

# Trusted Teleradiology Solutions Worldwide

Delivering excellence in radiology reporting to healthcare facilities globally

## Who We Are

RADPRO Teleradiology Private Limited is a trusted provider of comprehensive teleradiology solutions, delivering accurate, timely, and high-quality radiology reporting services to healthcare facilities across the globe. We connect hospitals, diagnostic centers, and healthcare providers with experienced radiologists who offer reliable interpretations across X-Ray, CT, MRI, ECG, and Mammography.

### Our Mission

To provide accurate, timely, and accessible radiology reporting services that empower healthcare providers to deliver exceptional patient care.

### Our Vision

To bridge the gap between technology and healthcare by providing accurate, timely, and trusted radiology solutions that improve patient outcomes globally.

### WHAT SETS US APART

- ✓ Experienced and qualified radiologist team
- ✓ Cutting-edge technology & PACS integration
- ✓ Stringent quality assurance processes
- ✓ HIPAA-compliant secure reporting platform
- ✓ Fast turnaround times, 24/7 availability
- ✓ Seamless image transfer & communication

*"At RADPRO Teleradiology, we combine cutting-edge technology, stringent quality assurance processes, and a team of highly qualified radiologists to ensure fast turnaround times without compromising diagnostic accuracy."*

CORE OFFERING

## Teleradiology Reporting

Expert interpretation and reporting of diagnostic imaging studies by qualified radiologists

Our core offering encompasses expert interpretation and reporting of diagnostic imaging studies by qualified radiologists, with secure transmission, structured workflows, and consistent turnaround times.

- ✓ Multi-modality reporting support
- ✓ HIPAA-compliant image exchange
- ✓ Scalable for single-site or multi-facility networks
- ✓ Structured report templates
- ✓ Clinical correlation and recommendations

CRITICAL CARE

## Emergency & Night-Hour Reporting

Healthcare never sleeps, and neither do we. Our emergency and night-hour reporting service ensures that your facility has access to expert radiology interpretations around the clock, including weekends and holidays.

### X-Ray Reporting

Routine and specialized X-ray examinations including chest, skeletal, abdominal, and pediatric studies with rapid turnaround.

### CT Scan Reporting

Detailed analysis of CT studies including contrast-enhanced scans, angiography, and emergency trauma protocols.

### MRI Reporting

Subspecialty MRI interpretations covering neuro, musculoskeletal, abdominal, cardiac, and breast imaging.

SPECIALTY SERVICES

### Second Opinion Services

Independent expert review of imaging studies to support confident clinical decisions. Our specialists provide detailed reassessment of complex cases.

### Quality Assurance & Peer Review

Structured quality control processes and peer review systems maintain reporting accuracy and consistency across every study we interpret.

THE RADPRO ADVANTAGE

## Why Choose RADPRO Teleradiology

Seven reasons healthcare facilities worldwide trust us with their radiology reporting

- Experienced Radiologists**  
Experienced and qualified radiologist team delivering expert interpretations across all modalities.
- Fast Turnaround**  
Fast turnaround times without compromising diagnostic accuracy or clinical detail.
- Quality-Focused Process**  
Stringent quality assurance and peer review systems for consistent, reliable reporting.
- Global Coverage**  
Serving hospitals, diagnostic centers, and clinics across the globe with consistent quality.
- 24/7 Reporting Support**  
Round-the-clock radiology reporting for emergencies, night shifts, and off-hours coverage.
- Secure & Compliant**  
Secure and compliant reporting platform with encrypted image transfer and HIPAA standards.
- Dedicated Support**  
Responsive customer and technical support for seamless operations and quick resolution.
- Seamless Integration**  
Easy PACS integration and workflow adaptation with minimal disruption to existing systems.

OUR TECHNOLOGY

## Technology-Driven Approach

### Secure Image Transfer & Reporting

Our HIPAA-compliant platform enables seamless transfer of diagnostic images, secure report delivery, and real-time communication between healthcare providers and radiologists.

- ✓ Encrypted image transfer
- ✓ Seamless PACS integration

### 24/7 Dedicated Support

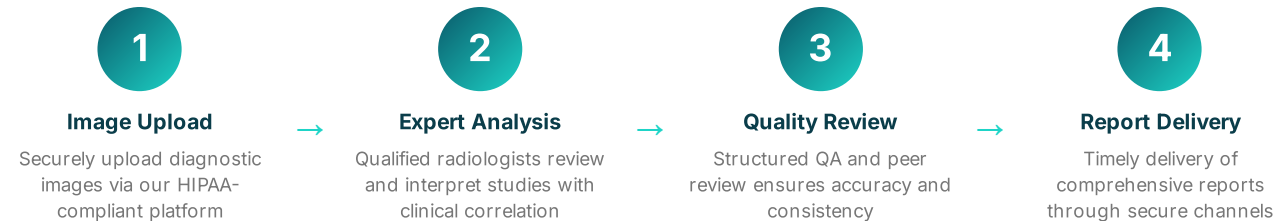

We provide continuous operational and technical support with fast turnaround times, including emergency and night-hour reporting when your facility needs it most.

HOW WE WORK

## Simple 4-Step Reporting Workflow

From image upload to final report delivery, our process is designed for efficiency

QUALITY COMMITMENT

## Committed to Better Patient Outcomes

### Quality Assurance & Peer Review

Structured quality control processes and peer review systems maintain reporting accuracy and consistency across every study we interpret.

- ✓ Qualified radiologist team
- ✓ Quality-focused reporting process
- ✓ Peer review for complex cases
- ✓ Continuous performance monitoring

### Data Security & Compliance

We take data security seriously. Our platform meets the highest standards for healthcare data protection.

- ✓ HIPAA-compliant platform
- ✓ End-to-end encryption
- ✓ Secure cloud infrastructure
- ✓ Regular security audits
